

Standard Operating Procedures & Workflows

BUSINESS OPERATIONS • EXECUTION FRAMEWORKS

1. Document Lifecycle Management

Content creation -> Approval Review -> Data Ingestion Pipeline -> Metadata Tagging -> Automated Archival/Purge.

2. Incident Response Workflow

System outages or latency degradation trigger automated alerts to on-call engineering leads, following a 3-tier escalation hierarchy.

3. Cross-Departmental Knowledge Sharing

Teams maintain structured knowledge bases updated bi-weekly to ensure the AI retrieval system accesses fresh, relevant data.
