

Enterprise Governance & Operational Policies

COMPANY POLICIES & GUIDELINES • AI KNOWLEDGE OS ARCHITECTURE

1. Acceptable Use Policy

All enterprise users, automated agents, and system integrated services must adhere to strict security protocols when interfacing with internal knowledge assets. Unauthorized data exfiltration or prompt injection manipulation is strictly prohibited.

2. Data Classification & Handling

Information assets are classified into Public, Internal, Confidential, and Restricted. Enterprise AI Knowledge OS vectors must enforce strict Access Control List (ACL) filters matching user credentials.

3. Compliance & Governance

Regular audits of model outputs and retrieval logs will be performed. System telemetry is retained in compliance with standard enterprise audit standards.
