

Regulatory & Legal Compliance Standard

LEGAL & RISK MANAGEMENT • ENTERPRISE GUIDELINES

1. Data Privacy Framework

Compliance with global data protection regulations (GDPR, CCPA, and regional equivalents). Personal Identifiable Information (PII) must be scrubbed before vector storage generation.

2. Audit & Lineage Tracking

All AI search transactions, vector lookups, and model responses must log immutable metadata to ensure complete auditability.

3. Ethical AI Governance

Models deployed in production must adhere to transparency and fairness benchmarks, with regular safety checks to prevent biased or toxic outputs.
